1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. The shoe as shown in figure 6.
- II. The shoe as shown in figure 7.
- III. The shoe as shown in figure 8.
- IV. The shoe as shown in figure 9.
- V. The shoe as shown in figure 10.
- VI. The shoe as shown in figure 11.
- VII. The shoe as shown in figure 12
- VIII. The shoe as shown in figures 13 and 14.
- IX. The shoe as shown in figure 15
- X. The shoe as shown in figures 16 and 17.
- XI. The shoe as shown in figure 18.
- XII. The shoe as shown in figure 19.
- XIII. The shoe as shown in figure 20.
- XIV. The shoe as shown in figure 21.
- XV. The shoe as shown in figures 22 and 23.
- XVI. The shoe as shown in figure 24.
- XV. The shoe as shown in figure 25.
- XVI. The shoe as shown in figure 26

XVII. The shoe as shown in figure 27.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a). The following claim(s) are generic: 66, 112, and 113.

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: all of the species have different special technical features which are not required by all of the species such as the overhangs, extents of adhesive coverage, gauze, seams, string lasting, etc..

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3728

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marie Patterson whose telephone number is 703-308-0069. The examiner can normally be reached on M-Th 6:30-4:00.
